13. REQUIREMENT/AUTHORITY Required to provide NPIC with a working test device to aid in the establishment of design parameters for NPIC color-duplicating systems of the future.		
14. TYPE OF WORK TO BE DONE Applied Research		
15. CATEGORIES OF EFFORT		
MAJOR CATEGORY Reproduction & Processing Equipment		SUB-CATEGORIES Paper (color) Printer-Processor Reproduction
16. END ITEM OR SERVICES FROM THIS CONTRACT/IMPROVEMENT OVER CURRENT SYSTEM, EQUIPMENT, ETC. This program requires the furnishing of a single-unit printer-processor with all operating appurtenances, maintenance, personnel instruction and expendable supplies.		
17. SUPPORTING OR RELATED CONTRACTS (Agency & Other)/COORDINATION This program has been coordinated throughout NPIC and with associated work being performed by the Air Force. The equipment is installed in PSD and is of significance to PAG, PID, TID, and PSD.		
18. DESCRIPTION OF INTELLIGENCE REQUIREMENT AND DETAILED TECHNICAL DESCRIPTION OF PROJECT (Continue on additional page if required) The objective is to provide NPIC with an engineering model of a new, extremely rapid, versatile, automatic, full-color printer-processor, for the purpose of in-house familiarization and experimentation in electrostatic color reproduction and its potential uses. Renewal of this lease is necessary because the printer-processor was not received until one-half of the fiscal year had elapsed. Installation and check-out will not be completed until the middle of April 1965. This will leave slightly more than two months on the present lease which is barely sufficient time for the laboratory personnel to become familiar with the device.

18. For this reason the original contract for a [REDACTED] level-of-effort has been reduced to [REDACTED] level of funding recommended for Fiscal Year 1966 is to complete the technical evaluation of this equipment, since additional time will be necessary to permit a thorough evaluation of the capabilities of this device in relation to conventional color print producing devices.
